Education

BTech, Computer Science And Engineering: Indian Institute of Technology Goa	CGPA: 8.21/10	2019 - 2023
Class 12, CBSE: Jawahar Navodaya Vidyalaya Bangalore Urban, Bengaluru	Aggregate: 88.6 %	2016 - 2018

Experience

Software Development Engineering -2 : TESCO - Worked On Trade Plan System design the whole Trade Plan system and develop most of application in Trade Plan. - Worked On Product location Uk/ROI system and heavy contributed in every aspect, New Feature, Security, Test case. - Worked On Range Transformation application that consist automation of creation of Planogram with Intelligence wherever we can. - Worked On Distributed store level application. Heavy contributed to most of Tesco SRM application. - Design and develop Product location CE system. Wrote the security library, which is used in all SRM applications. - Completed more than 45 weeks OnCall for Merchandising API applications.	<i>[Jan 2025-Present]</i>
Software Development Engineering -1 : TESCO - Wrote five new micro service in java. Made many Enterprise API, Created many Jenkins pipelines with writing CI-CD files, GitHub actions. - Worked on Kafka creation Events and worked on many streaming services. Worked on distributed system in store level running services - Worked as Full Stack developer who start everything from scratch, design and write the code till deployment and tested and support also.	<i>[July 2023-Dec 2024]</i>
Software Development Engineering Intern :VMware - Wrote JUnit testcase for Java application. Work on writing the automated rake Task for cleaning various S3 buckets. - Learned Ruby, Rails framework, JUnit. Added the new search feature in cloud Health UI from the backend in the group. - Worked on validation work of few application of cloudhealthtech.com and worked in making API in Ruby in rails Framework.	<i>[June 2022-Nov 2022]</i>
Machine Learning Intern :Verzeo - Under this internship I learn how to implement Python libraries(Pandas, NumPy, Scikit-Learn, Seaborn) and other Python libraries used in Machine learning and EDA(Exploratory Data Analysis). Here I make many model which is used in corporate world in resolving many society problem. - Learned all Type Supervised and few Unsupervised Machine Learning Algorithms..	<i>[July 2020-Aug-2020]</i>

Projects

Developing Algorithm for Machine Learning - Here I write all machine Learning Algorithm by my own self from Scratch using Python by this I learn how to develop Machine Learning algorithm. - K-NN[Code], Preprocessing - Regularization [Code], Decision Tree[Code], Naive Bayes[Code], Random Forest [Code] - I created model also on Relevant (Real world problem) Problem like Spam Classifier(Naive Bayes) by using these Created Algorithm.	<i>[Dec 2020 -Present]</i>
GameInShape [Code] - Building an Innovative online gaming platform that integrates Online gaming with varied levels of physical activity, providing users a unique and a flexible gaming experience thereby ensuring physical fitness at the same time. - Using the Power of Computer Vision and Deep Learning techniques along with Python, OpenCV we are implementing Virtual Switches to do the task.	<i>[Jan 2021-Present]</i>
Learnspac-Learning Platform [Link] - Creating a web application where institutes can register and create courses for their students, providing an integrated editor to write and test code for coding exercises. I worked here as Full Stack developer. We are using MERN Tech stack along with AWS service(S3, Amplify, SES, EC2) - This platform have Code chef and Google Class Room feature along with other feature. I got hands-one experience in React, Express, Node	<i>[Jan. 2023 - Present]</i>

Skills

Programming Language	: C, C++, Python, Ruby, JavaScript, TypeScript, Java, Groovy,
Computer Skills	: Windows, Linux (Ubuntu), Unix, Git, GitHub, DSA, Competitive Programming
Development Software Skill	: S3, SQL, MongoDB, Postgress, Couchbase, Spring Boot, Spring, Micronaut
Relevant Coursework:	: Machine Learning, Data Science, MERN, Java Framework, Rails Framework
Other Skills:	: Problem Solving, Time Management, Leadership skills, Team player.

Positions of Responsibilities

Student Mentorship Program	: This year selected to mentor 1 Students in IIT GOA.	<i>(2020-Present)</i>
Core member of sponsor team	: member of IIT GOA sponsor team for technical fest("Cepheus") and Cultural fest("CultRang")	<i>(Nov 2020-Jan 2021)</i>

Achievements

- Secured JEE Advance Rank **AIR 2210** JEE Mains **AIR 2910**.
- Our Team project on "IYPT2019" got first prize in IIT GOA. *(Sept-2019)*
- Our Team project "GameInShape" was selected by IIT GOA under Innovation Competition POC (Proof of concept) for funding by MHRD. *(Nov 2020)*
