

SATYAM TIWARI

B.Tech IT Student — Aspiring AI/ML Engineer

sttiwari9211@gmail.com — +91-8543874104 — Mainpuri, Uttar Pradesh — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Career Objective

Full-stack developer with applied AI experience — building CyberShield Hub, a 6-module heuristic cybersecurity platform using rule-based classifiers, heuristic analysis, and LLM API integration. Seeking an AI/ML or applied AI role where software engineering foundations accelerate model development and intelligent system design.

Experience

Freelance LaTeX Developer · Remote · Jan 2025 – Present

- Delivered 2+ print-ready technical books (200+ pages each) with zero client revisions by structuring custom LaTeX macros, multi-level TOC, and BibTeX-automated bibliography
- Cut client's formatting timeline by 40% by building reusable chapter templates and managing font embedding and page geometry for press-ready PDF output

Projects

CyberShield Hub — Heuristic Cybersecurity Suite (AI Assistant Integrated) (In Progress)

JavaScript · Node.js · Express.js · REST API · Rule-Based Detection · Heuristic Analysis · Pattern Matching · Chrome Extension API (In Progress)

- Building a full-stack heuristic cybersecurity platform with 6 active detection modules — phishing link scanning, deepfake detection, and malicious QR analysis — consolidating threat detection into a single suite, with an integrated AI Assistant for real-time risk explanation, targeting public deployment.
- Engineered the core phishing detection engine achieving 91% accuracy across 35 URLs using an 8-rule heuristic classifier with domain entropy scoring, TLD pattern matching, and redirect chain analysis — applying security best practices aligned with real-world threat detection systems.
- Developing an AI Assistant module using LLM API integration to explain threats, analyze suspicious content, and provide real-time security recommendations to non-technical users.

Full-Stack Portfolio Website

Node.js · Express.js · MongoDB Atlas · REST API · JavaScript · HTML/CSS · Render · GitHub Pages

- Architected and deployed a production full-stack web application on Render with 3+ months of continuous uptime by implementing Express.js routing, middleware chaining, and MongoDB Atlas cloud database integration
- Designed RESTful API endpoints following HTTP semantics (GET/POST/DELETE, proper status codes, JSON schemas) and built a fully responsive CSS Flexbox/Grid UI — live at [Portfolio](#)

Technical Skills

Languages: Python (OOP, File Handling), JavaScript, Java, C

Web & Backend: Node.js, Express.js, Express Middleware, REST API, MongoDB, HTML, CSS

AI/ML & Data: NumPy, Pandas, Matplotlib, Rule-Based Systems, LLM API Integration

Tools: Git, GitHub, VS Code, GitHub Pages, Render

Achievements

- **GitHub Pull Shark:** multiple merged pull requests across public repositories, demonstrating consistent open-source contribution.
- **SoftPro technical workshop:** covered JavaScript fundamentals; applied concepts directly in CyberShield Hub and Portfolio Website projects.

Education

B.Tech in Information Technology Rajkiya Engineering College, Mainpuri (AKTU)

3rd Year Currently Pursuing · Expected 2027 · CGPA: 6.82/10

Intermediate (+2): 81% (2023) · High School: 81% (2021)
